Subject: Protection of California's Aquifers from Toxic Oil Waste

To Whom it May Concern:

Please say "NO!" to contaminating our underground water source with dangerous chemicals by allowing oil companies to make Price Canyon a dumping ground for toxic waste. As long term residents in the Price Canyon area who have raised our children, grandchildren, and the animals on our land with water from the wells that risk contamination if the exemption is allowed, we urge the EPA to deny the Freeport McMoRan proposal.

There are families like us all over the state of California whose precious water supply is at risk. As you ponder this proposal from oil companies, please have a fresh glass of water and remember those of us who may not have the opportunity in the future if the exemption is passed to enjoy a glass of water from our wells, uncontaminated by oil toxic waste. Consider further, would you wish for you or your family to be drinking this contaminated water?

Please do the right thing and deny the exemption. Thank you.

Sincerely,

Jimmie and Kathleen Howell
